

Pulmonology Function Testing

YEAR FUNDED AMOUNT FUNDED
2014 \$100,000

The portable PFT and Lung Clearance Index machines allow respiratory therapists and RNs to perform testing simultaneously, providing a more efficient clinic flow and management of airway diseases.

Veinviewer Imaging System

YEAR FUNDED AMOUNT FUNDED
2007 \$25,000

This system projects the image of the vessels directly onto the patient's skin for a blood draw, which eliminates the "guesswork" in locating a vessel and frees clinicians to use their hands.
